

WORK IN PROGRESS

06/02/2009

We had a meeting with our promoter, Jeroen Doggen. We went over our master contract and our gannt diagram. We compared our progress with our gannt diagram and we were on schedule. We are investigating the two projects of the thematic ICT week (in these week we made an application which consists out off a controller, 2 GUI's and 2 WSN's) and we are comparing them so we can use the best parts.

We made some agreements:

- Keeping logbook updated on the wiki website
- Using wiki website as communication medium
