

# WORK IN PROGRESS

21/04/2009

We discussed our progress until now: the basic interface with Scala is set up. The application for the telosb notes and GUI are finished. So, the control panel is finished and the application of the telosbThe controller needs to be further updated to be able to completely interface with Scala.

We discussed our progress and we are almost on schedule.

We discussed possible research fields (density, external antenna, radiation pattern, different algorithms, and the location of test area.

Some agreements:

- Putting schedule & paper on wiki
- Checklist for master contract
- New name for master thesis ?
